

ALEXANDAR UKPONG ASIDO, Front-End & React-Native Developer

Portfolio: [Asido's Portfolio](#) Tel: +2348103717215 Email: alexandaras2015@gmail.com

SKILLS

- Mobile Development: React Native, TypeScript, Cross-Platform Mobile Development (iOS & Android), Expo.
- Web Development: HTML, CSS, Tailwind CSS, JavaScript, React, Next.js, Responsive Design, Vercel.
- Tools & Frameworks: Git/GitHub, Firebase, REST APIs,
- Soft Skills: Strong Analytical Skills, Problem-Solving, Effective Communication, Collaboration with Design Teams.

FEATURED PROJECT

Nolt Finance App

A mobile-first fintech application built with React Native and Expo, offering users secure access to digital banking, loans, and investment services in Nigeria.

- Loan Management – Apply for loans, track repayments, and view active loan history seamlessly.
- Doja Face Verification – Secure biometric onboarding for identity verification.
- Fund wallet via Paystack integration, transfer money from wallet to bank, and monitor transactions in real-time.
- Investments – Grow savings with in-app investment opportunities.
- Smooth UX – Built with reusable components, Formik & Yup for form validation, and Lottie animations for a polished experience.
- Bill Payments – Pay airtime, data, and utility bills directly from the app.
- Fully available on both iOS App Store and Google Play Store.

Ogeri Health Foundation – Electronic Health Record App

- Developed a cross-platform Electronic Health Record (EHR) app for patients, health workers, and administrators, enhancing medical data management and accessibility.
- Implemented secure authentication and role-based access control for different user types.
- Integrated REST APIs using Axios and Redux Toolkit to manage patient records, consultation notes, and medication tracking.
- Designed and optimized a responsive UI/UX for a seamless user experience, ensuring smooth navigation and data synchronization.
- Added features such as blood pressure tracking with Line graph and consultation for patient and Health Worker.
- Ensured performance optimization, debugging, and real-time data updates for improved app efficiency.

TipNGoal – Your Favorite Football App

- TipNGoal is a cross-platform mobile app, developed using React Native.
- The app is designed for sports prediction, offering users accurate predictions with a high win rate.
- It integrates a football API to provide real-time scores and upcoming match schedules.
- TipNGoal features smooth animations, user authentication via email and password, an intuitive interface, and seamless navigation to enhance the overall user experience.
- Additionally, TipNGoal boasts a sleek website with dynamic animations powered by Framer Motion.

Kreados – Online Shopping Mall

- Developed Kreados, a cross-platform eCommerce mobile application using React Native, Expo, Firebase and Redux.
- Designed modern UI/UX with Tailwind (NativeWind), custom fonts, and a 3-image carousel banner on the Home screen.
- Integrated state management via Redux slices to store user authentication, cart, and shipping details.
- Optimized for scalability and responsive layouts, ensuring a seamless experience on both iOS and Android.
- Created custom animated preloaders and loaders with React Native Reanimated, SVG, and Blur effects for improved UX.

PROFESSIONAL EXPERIENCE

Consultant Mobile Developer – Nolt Finance [May 2025 - Present] - Remote

- Integrated **Doja** for **biometric verification** to strengthen user onboarding and compliance.
- Connected to **backend RESTful endpoints** for authentication, loan processing, wallet services, investments, and bill payments — tested extensively using Swagger and Postman.
- Developed **loan management features** (loan application, repayment tracking, active loan status, and loan history) with a clean, responsive UI.
- Leveraged **Redux Toolkit**, JWT & Axios for secure state management and API handling.
- Implemented Paystack **integration** for seamless wallet funding, and built wallet-to-bank transfer for easy fund withdrawals.
- Successfully developed, deployed, and published the Nolt Finance app on both the iOS App Store and Google Play Store.

Mobile App Developer – Transweeft (Contract) [April 2025 – May 2025] - Remote

- Maintain and enhance cross-platform mobile applications using React-Native
- Implement and manage API integrations, connecting backend services with intuitive frontend designs.
- Collaborate remotely with cross-functional teams to ensure seamless user experiences and efficient app performance.

Front-End Mobile Developer – B-Cloud Technologies [March 2024 – March 2025] - Remote

- Collaborated with product designers to refine UI/UX and develop interactive frontend components, enhancing user experiences.
- Created architectural designs, frameworks, and screens for the app.
- Integrated backend APIs using Axios and Redux Toolkit, efficiently managing authentication.
- Led the frontend development of the **Electronic Health Record (EHR) System**, ensuring a seamless and responsive user experience for **patients, health workers, and administrators**.
- Conducted thorough debugging and performance optimization, ensuring smooth navigation and API data synchronization.
- Utilized **React Native** and **TypeScript** to build a scalable and cross-platform mobile app for Android and iOS.

Frontend Developer – EarlyCode [May 2023 – Feb 2024]

- **Mobile App Development:** Developed SkyCart, an e-commerce mobile application designed to streamline online shopping and enhance user convenience.
 - Collaborated with a UI/UX designer to create visually appealing and dynamic screens aligned with modern app standards.
 - Implemented Firebase for secure user authentication and efficient data storage.
 - Integrated Paystack for seamless and secure payment processing.
 - Ensured smooth performance across both Android and iOS platforms, focusing on responsive design and optimal usability.
- **Web Development:** Developed a feature-rich *To-Do Web Application* to help users efficiently manage tasks.
 - Designed and implemented the web app layout, ensuring a user-friendly and responsive interface.
 - Integrated core functionalities, including user authentication, using Next.js for enhanced security and performance.
 - Optimized the application for scalability and cross-platform compatibility, delivering a reliable user experience.
 - Collaborated with the design team to refine features and improve usability based on user feedback.

EDUCATION AND TRAINING

- **Android and IOS Development** - **[2023]**
Early Code
- **Web Development in React And Next Js** - **[2022]**
Early Code
- **Bachelor of Arts (History)** - **[2014]**
University of Calabar
